

## **Summary of the 2009 Annual Report of the Hungarian Academy of Engineering (HAE)**

The HAE organized several scientific meetings, seminars and conferences with Hungarian and foreign participation in 2009.

The main interdisciplinary topics of the HAE activity were:

- food security
- engineering education
- energy policy, renewable energy sources
- innovative surface traffic systems

In May 2009 we organized – together with other engineering organizations – the 3<sup>rd</sup> “Engineering Days” in Hungary. The events were organized at the first day in the Hungarian Academy of Sciences, at the second day in the Hungarian Parliament.

The main discussed theme was in connected with the ENERGY.

The HAE participated in the work of CAETS and also of the Euro-CASE.

The number of the HAE members increased to 210 during the last year.
