

## Troxler

Peter Troxler (\*1966) is a Research Professor at Rotterdam University of Applied Sciences, The Netherlands. He studies the impact of readily available digital technologies – from media and manufacturing to algorithms and AI – on the creative and manufacturing industries. A particular field of research are the design and manufacturing practices of “fabbers” and “makers”, and the emergence of networked co-operation paradigms and business models based on lateral governance and open-source principles. Peter holds a PhD from ETH Zurich, and he has worked in industry, as a consultant and in academia in Switzerland, Scotland, and the Netherlands.
