

## **Joachim Meister**

Joachim is the Group Senior Vice President for Power and New Energy across Worley. He is an experienced senior leader with demonstrable success in managing regional teams and driving large capital projects.

Joachim has more than 25 years of experience within the resources and energy industries, spanning all phases of project development from concept development to detailed design, construction and operation. He also has experience working in diverse teams across Europe, Asia, Australia, and Latin America.

Joachim was Managing Director and Senior Vice President for Northern Latin America, achieving significant year on year revenue growth, Director of Integration, leading the integration of an acquisition in China, and Managing Consultant for Power and New Energy for the EMEA and Americas region.

Joachim's technical and commercial expertise includes P&L responsibility and ownership, strategy development and implementation, business development, change and turnaround management across multiple sectors, including power, renewables, low-carbon hydrogen, hydrocarbons, mining, and infrastructure.

Joachim is a Mechanical Engineer from the Technical University in Munich and an MBA from IMD, Lausanne.
