

**Stéphane Bourg** joined the Bureau de recherche géologiques et minières (BRGM) in November 2022 as Director of the French Observatory of Mineral Resources for industrial sectors (OFREMI).

Previously, at the French Alternative Energies and Atomic Energy Commission (CEA), he worked on the environmental impacts of energy transition scenarios. These last years, he has focused on circular economy models of raw materials value chains taking into account service economy and industrial and territorial ecology.

Involved for more than ten years on the issue of critical raw materials and their supply, he has led the European expert network on critical raw materials (SCRREEN.eu) which supports the European Commission in the establishment of the European list of critical raw materials since 2016.

He is member of the COMES (French Strategic Metals Committee led by the Ministry of Ecological Transition) and president of PROMETIA, an international association promoting mineral processing and extractive metallurgy.
