Christophe CORD'HOMME is a graduate engineer from Mines Paris Tech (France). He has over 30 years' experience in the Environment and Renewable Energy industries, particularly in municipal waste treatment, air pollution control & renewable energy production (ANDRA, ENTROPIE, CNIM, LAB, WasteTT).

Former deputy general manager of LAB S.A. and director of development for the CNIM group, he managed key and complex Waste-to-Energy projects in Europe and developed innovation and business intelligence for the sector. In 2022, he created his consulting company WasteTT (Waste Thermal Treatment) S.A.S. offering expertise in resource recovery. Drawing on his industrial experience, he has published numerous papers and is invited as a world-renowned speaker at international conferences on renewable energy and environment.

He is Vice Chairman of the Working Group on Energy Recovery of the ISWA (International Solid Waste Association) and a lecturer in the Master Environment programme at Sorbonne Paris Nord University.
