

Alice Vadrot has been Professor for International Relations and Environment at the Department of Political Science since March 2025. She completed her doctorate on the World Biodiversity Council in 2013 and returned to the University of Vienna in 2017 after a two-year research stay at Cambridge University as an Erwin Schrödinger Fellow of the Austrian Research Fund (FWF). Her focus is on researching the interface between science and politics in international environmental diplomacy and developing new methodological approaches to examining the role of knowledge in international negotiations. In 2018, the political scientist received an ERC Starting Grant for her project MARIPOLDATA (2018-2024), in which she and her research group are mapping negotiations on a new agreement to protect the high seas and the development of the scientific field of marine biodiversity. As part of the EU project MARCO-BOLO (2022-2026), she is investigating the need for data in biodiversity policy and nature conservation practice. Vadrot is a member of the Young Academy of the Austrian Academy of Sciences (ÖAW), the Mission Board of the EU Water Mission, the Management Board of the Environment and Climate Hub of the University of Vienna and the management team of the Austrian Biodiversity Council.
